# Interview Questions and Answers

Questions / [Bootstrap Interview Questions and Answers](#)

## Questions and Answers Questions and Answers

Bootstrap is a mobile first front-end framework for faster and easier web development. It uses HTML, CSS,

**Scatfolding:** Bootstrap provides a basic structure with Grid System, link styles, background. This is is covered in detail in the section Bootstrap Basic Structure

**CSS:** Bootstrap comes with the feature of global CSS settings, fundamental HTML elements styled and enhanced with extensible classes, and an advanced grid system. This is covered in detail in the section Bootstrap with CSS.

**Components:** Bootstrap contains over a dozen reusable components built to provide iconography, dropdowns, navigation, alerts, popovers, and much more. This is covered in detail in the section Layout Components.

**JavaScript Plugins:** Bootstrap contains over a dozen custom [jQuery](#) plugins. You can easily include them all, or one by one. This is covered in details in the section Bootstrap Plugins.

**Customize:** You can customize Bootstrap's components, LESS variables, and jQuery plugins to get your very own version.

### What is Bootstrap Grid System?

Bootstrap includes a responsive, mobile first fluid grid system that appropriately scales up to 12 columns as the device or viewport size increases. It includes predefined classes for easy layout options, as well as powerful mixins for generating more semantic layouts.

### What are Glyphicons?

Glyphicons are icon fonts which you can use in your web projects. Glyphicons Halflings are not free and require licensing, however their creator has made them available for Bootstrap projects free of cost.

### Define Bootstrap Breadcrumb?

Breadcrumbs are a great way to show hierarchy-based information for a site. In the case of blogs, breadcrumbs can show the dates of publishing, categories, or tags. They indicate the current page's location within a navigational hierarchy.

A breadcrumb in Bootstrap is simply an unordered list with a class of `.breadcrumb`. The separator is automatically added by CSS (bootstrap.min.css) through the following class:

```
.breadcrumb > li + li:before {  
  
  color: #CCCCCC;  
  
  content: "/ ";  
  
  padding: 0 5px;  
  
}
```

### Define Bootstrap thumbnails?

A lot of sites need a way to lay out images, videos,text, etc in a grid, and Bootstrap has an easy way to do this with thumbnails.

To create thumbnails using Bootstrap:

- This adds four pixels of padding and a gray border.
- On hover, an animated glow outlines the image.

- .btn-success
- .btn-info
- .btn-warning
- .btn-danger
- .btn-link

## What are Bootstrap Form Rules?

- Always use `<form role="form">` (helps improve accessibility for people using screen readers)
- Wrap labels and form controls in `<div class="form-group">` (needed for optimum spacing)
- Add class `.form-control` to all textual `<input>`, `<textarea>`, and `<select>` elements

## What are Bootstrap Alerts ?

Bootstrap Alerts are used to provide an easy way to create predefined alert messages. Alert adds a style to your messages to make it more appealing to the users.

There are four classes that are used within `<div>` element for alerts.

- .alert-success
- .alert-info
- .alert-warning
- .alert-danger

## What is Bootstrap pager ?

The bootstrap pager is a form of pagination. It is used to create previous and next buttons (links).The **"pager"** class is used within the `<ul>` element to create the previous / next buttons.

### What is the role of pagination in bootstrap and what are their classifications?

When an unordered list has to be handled by bootstrap, it uses pagination. To handle the list, different classes are available such as `‘.pagination’`, `‘.disabled’`, `‘.active’`, `‘.pagination-lg’`. The function `‘.pagination’` to paginate the webpage. The function `‘.disabled’` is used to make the links unclickable. The function `‘.active’` is used for indicating the current webpage. The function `‘.pagination-lg’` and `‘.pagination-sm’` can be used for getting different size items.

There are several styling navigation elements available on bootstrap and every style uses the same function i.e. 'class .nav'. In order to create tabs or a tabular navigation, you can begin with a simple or rather basic unordered list. In the case of the tabs the function 'class .nav-tabs' can be used.
