

# Mega.nz HACK

## How to Create Unlimited Accounts & Bypass The Transfer & Download Quotas For FREE!

Hey Guys,

As you probably already know, having a free Mega.nz account is pretty limited. You only have 50GB of storage and downloading any large files can take forever as you continue to get the error “Quota Exceeded” Upgrade Now or Wait 6 hours to continue : (

After much digging around, I finally found a solution which is what I’m going to share with you today.

Enjoy,

# PART 1 – Creating Unlimited Free Accounts

**STEP 1:** Go to 10Minute Mail: <https://10minutemail.com> and grab the temporary email that you will use to open your new Mega.nz account.

**STEP 2:** Go to Mega.nz & Create an account using the email from 10MinuteMail

Create your **free** account

First name  
Oliver

Last name  
Menard

Email  
osupspucddicbmnr@ttrv.com

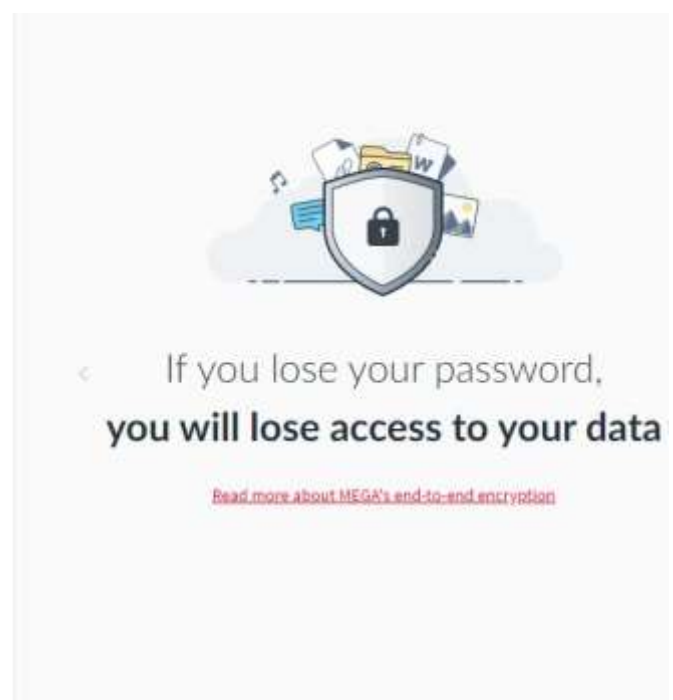

Password  
..... Strong

This password will withstand most sophisticated brute-force attacks. Please ensure that you will remember it.

Retype password  
.....

☒ I understand that if I lose my password, I may lose my data. Read more about [MEGA's end-to-end encryption](#).

☒ I agree with the MEGA [Terms of Service](#)

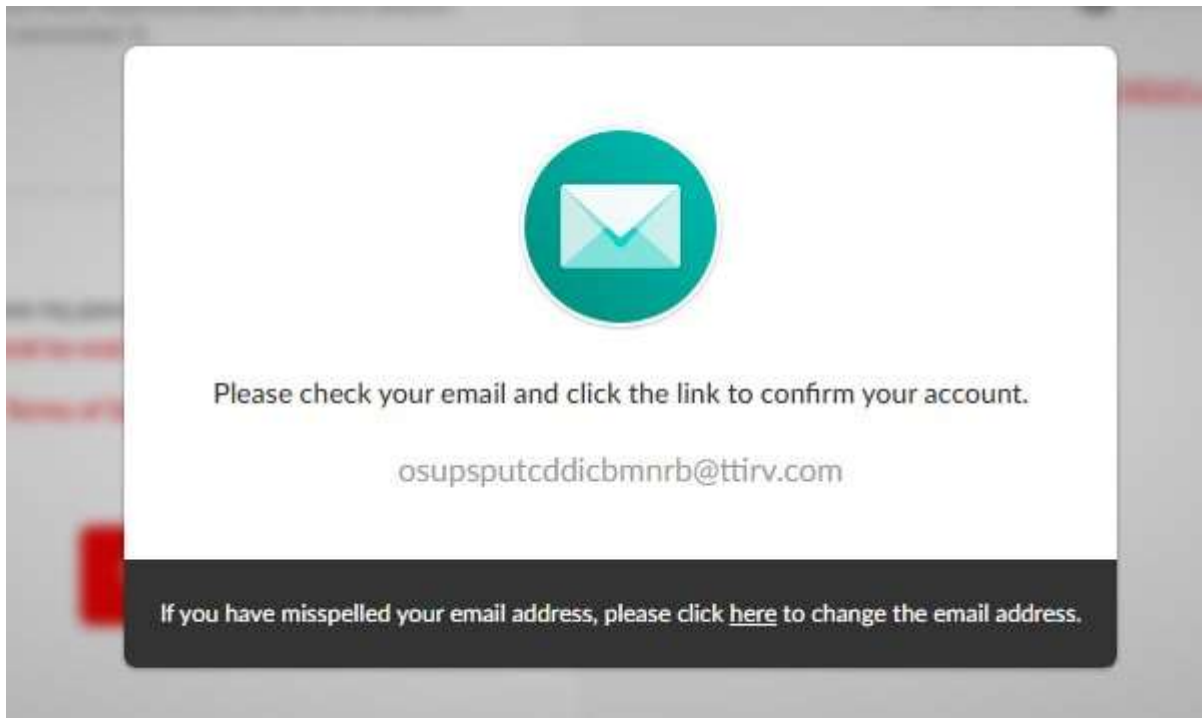

Make up a name and password. \*\*\***Make Sure You Write It Down**

**FREESOFF**  
WORLD NEED OFFERS

join our community [freesoff.com](https://freesoff.com)

**STEP 3:** Now you will be asked to verify your email by Mega.nz

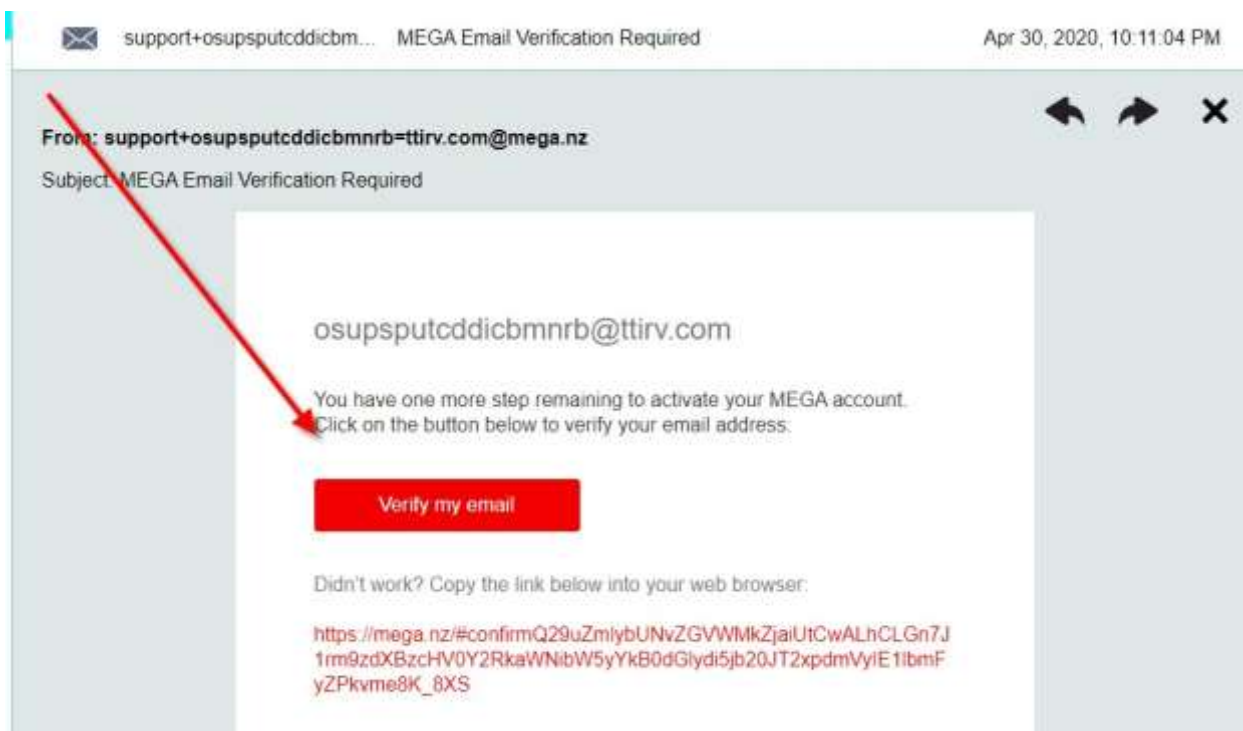

Go back to 10MinuteMail site and you will receive the notification

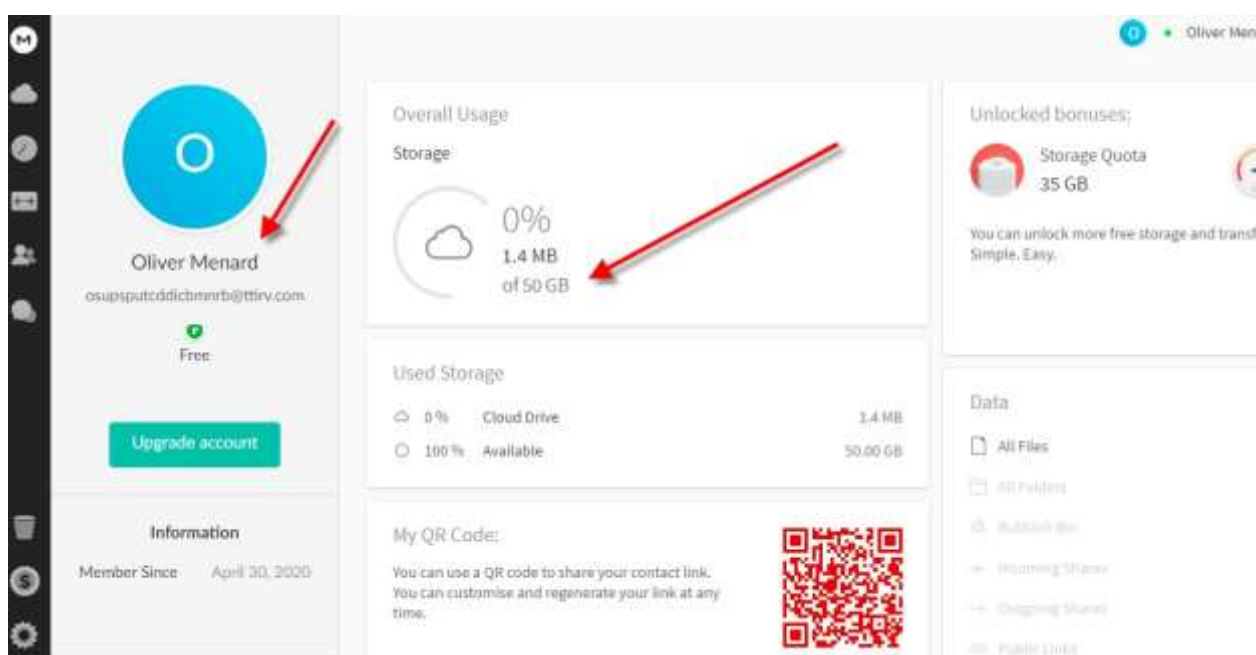

**FREESOFF**  
WORLD NEED OFFERS

join our community [freesoff.com](https://freesoff.com)

#### **STEP 4:** Click on “Verify My Email”:

And Voila ... Now you have a brand new account with 50GB

Anytime you need more storage, just repeat the process : )

**\*\*\*VERY IMPORTANT** – Make sure that you keep track of the email, password & backup recovery key – If you lose this then you can't recover your account

## PART 2 – Bypassing the Import Limits

As you already know a free Mega.nz account limits you to 50GB's of cloud storage. Recently I purchased a script that will allow you to bypass this limit when importing Mega.nz links to your account.

**Example:** Let's say your account is almost full as it already has 45GB's of storage used, but you still want to import a Mega.nz link that is 20GB's. Technically you don't have enough space to import, but with this script it's no longer a problem as you will now be able to bypass this limit and still have access to all of your files even though you have used up more storage then you are allowed.

I'm going to share this script and how to set it up (very easy) here, but before I do there are a few conditions that you need to keep in mind:

- Make sure your account is not already full (Once the import is complete, your account will be full)
- Recommended to use on a new account (Not a problem. Refer to Part 1 of this guide)
- This works **ONLY for IMPORTING Mega.nz Links** (importing is different from uploading & will not work for uploading)

Now with that out of the way ... Let's Get Started

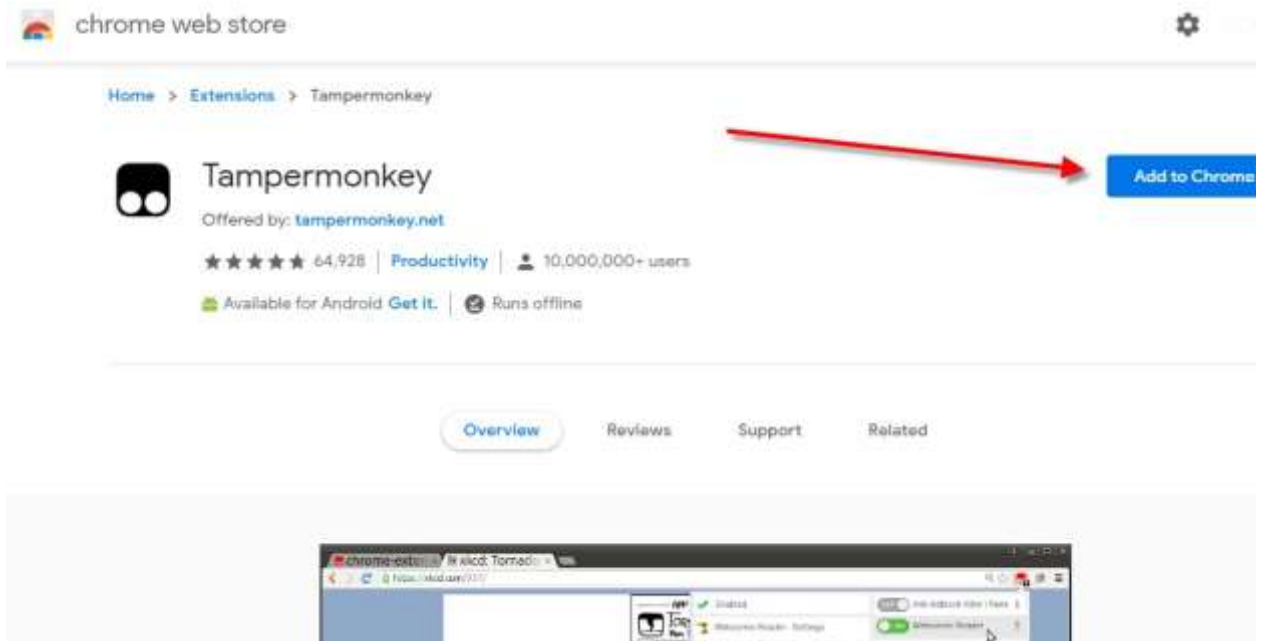

**FREESOFF**  
WORLD NEED OFFERS

join our community [freesoff.com](https://freesoff.com)

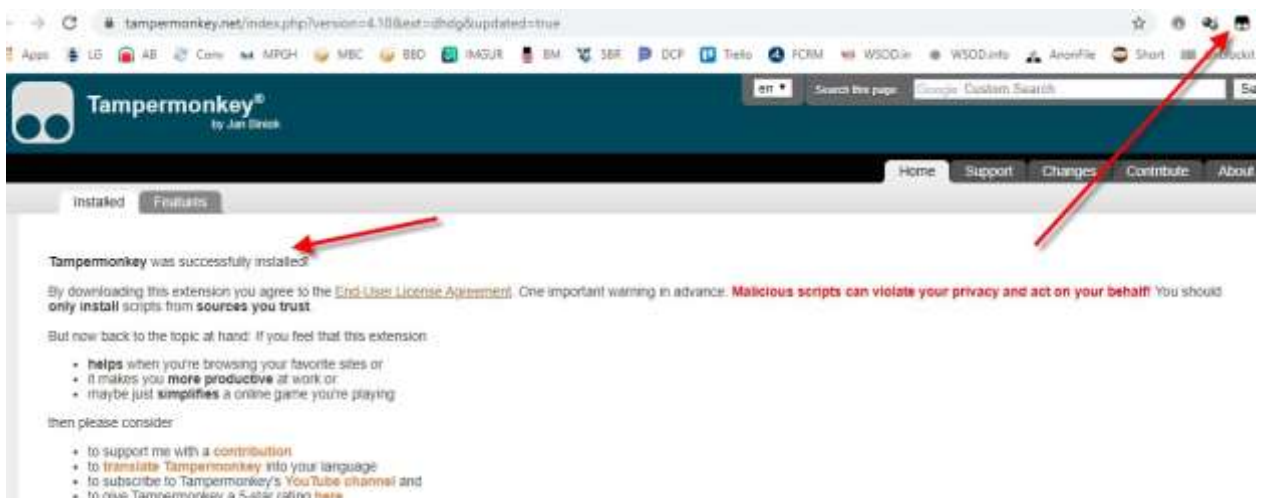

**STEP 1:** To run the script you first need to add the Google Extension Tampermonkey to your browser (Chrome is Recommended)

Tampermonkey is the world's most popular userscript manager with over 10 Million users. It's free to use and can be downloaded from the Google Chrome Webstore here:

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjoiejmpblmpobfkfo?hl=en>

Once the file is downloaded and installed you will receive a notification of the installation and you will have the Tampermonkey icon added to the top right hand corner of your browser:

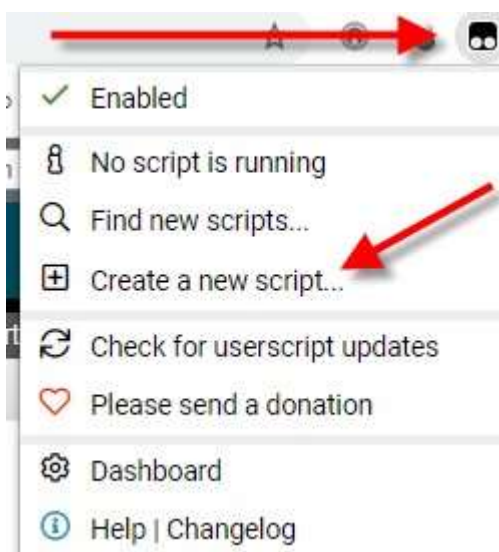

**FREESOFF**

join our community [freesoff.com](https://freesoff.com)

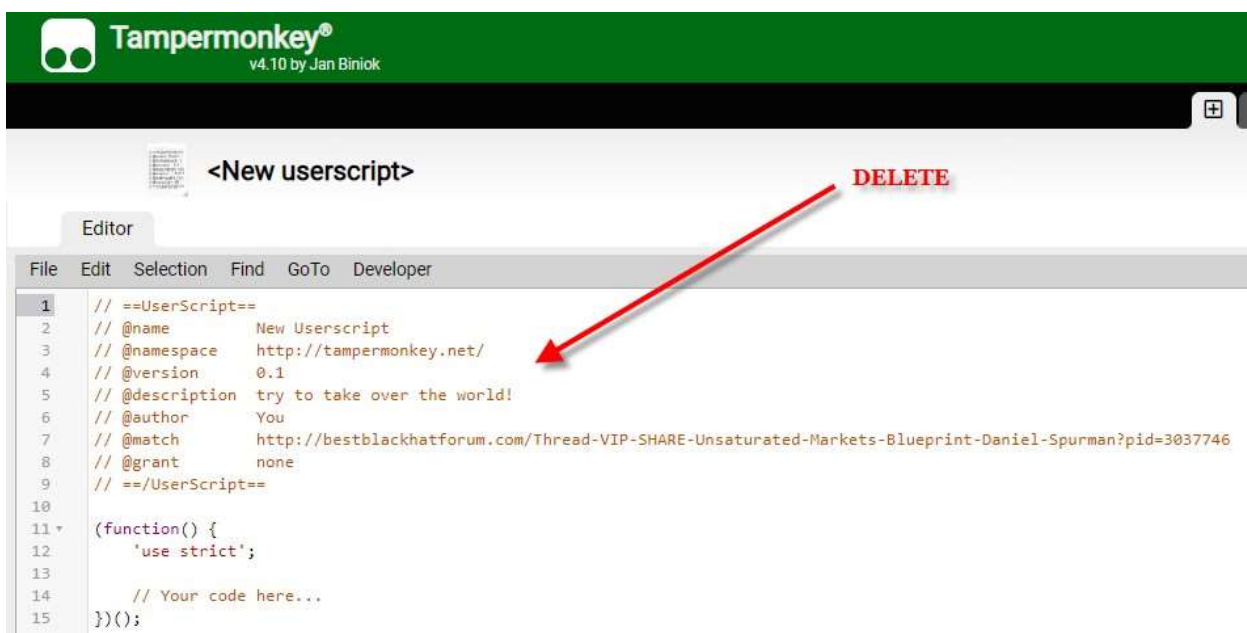

**STEP 2:** Now we are going to install the script.

Click on the Tampermonkey Icon from your browser and choose the “Create a New Script”

This will open up the Script Editor. Delete all of the content that is already prepopulated

Now copy the script from the pastebin link below

=====

**Mega.nz Script:** <https://pastebin.com/4AXkE1yE>

COPY FULL SCRIPT

```
1. // ==UserScript==
2. // @name      MEGA.nz Ultimately Import
3. // @name:zh-TW MEGA.nz Ultimately Import /
4. // @name:zh-CN MEGA.nz Ultimately Import
5. // @namespace  methusele
6. // @version    0.1
7. // @description Bypass import limit on Mega Web client & remove warning about the space usage
8. // @author      @0gkiller07
9. // @match      chrome-extension://bigefpfnhfccddifaedafhaibnlgkod/*
10. // @match      http://mega.co.nz/*
11. // @match      http://mega.io/*
12. // @match      http://mega.is/*
13. // @match      http://mega.nz/*
```

And paste it into the Tampermonkey userscript section. Then click file & save:

Tampermonkey®  
v4.10 by Jan Biniok

<New userscript>

Editor

File Edit Selection Find GoTo Developer

Save Ctrl-S  
Save to disk  
Editor reset  
Close Ctrl-Q

```
1 if (opSize === -1) {
2   opSize = data.mstrg;
3 }
4
5 if (opSize > data.mstrg - data.cstrg) {
6   var options = {custom: 1, title: 1[882], body: 1[16927]};
7
8   M.showOverStorageQuota(data, options)
9     .always(function() {
10       promise.reject();
11     });
12 }
13 else {
14   /*
15   promise.resolve();
16 }
17 };
18 return promise;
19 };
20 }
```

Now just make sure that it's enabled and you're all set:

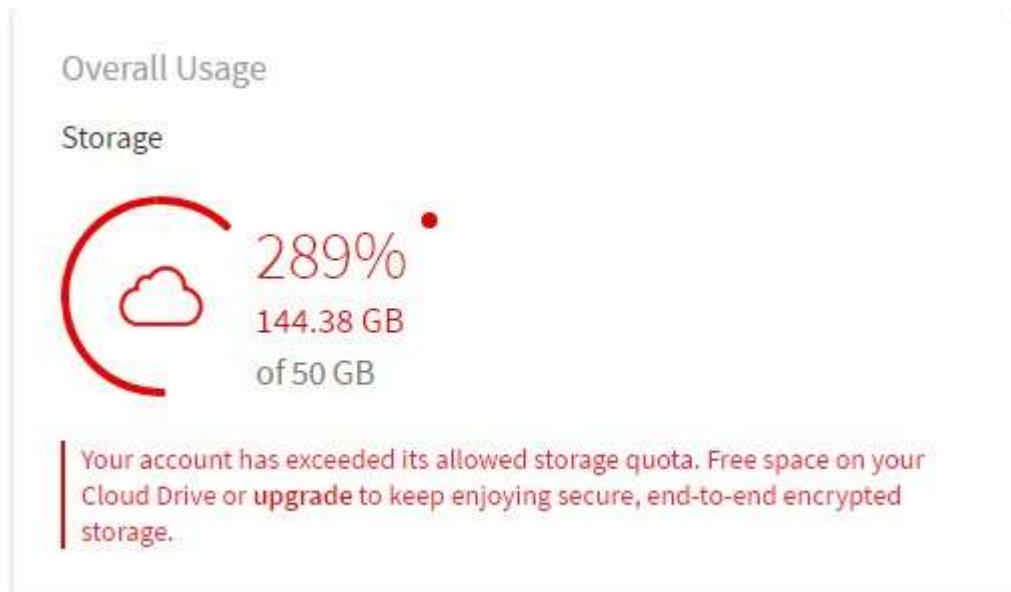

Tampermonkey®  
v4.10 by Jan Biniok

Installed userscripts

#	Enabled	Name	Version	Sites	Features	Homepage
1	<input checked="" type="checkbox"/>	MEGA.nz Ultimately Import	0.1			

As long as there's a remaining space in your cloud, you can import any link bypassing the 50GB limit:

## PART 3 – ByPassing The Download Quota

If you have done any type of downloading from Mega.nz then you have probably run into the dreaded “You’ve Exceeded Your Limit” – Upgrade or Wait :(

 Free transfer quota exceeded

Please upgrade your account to continue immediately, or wait 5 h 32 m to continue for free.

PRO LITE	PRO I	PRO II	PRO III	BUSINESS
4.99 € /month	9.99 € /month	19.99 € /month	29.99 € /month	10€ per user /month
400 GB Storage 1 TB Transfer	2 TB Storage 2 TB Transfer	8 TB Storage 8 TB Transfer	16 TB Storage 16 TB Transfer	UNLIMITED Storage and Transfer

Your download could not proceed because it would take you over the current free transfer allowance for your IP address. This limit is dynamic and depends on the amount of unused bandwidth we have available.

Here's the work around ...

**STEP 1:** Head over to Psiphon: <https://www.psiphon3.com/en/index.html> and download the version for windows

Direct Downloads

**Psiphon for Android direct download**  
If you do not have access to the Google Play Store, you can download and install ("sideload") Psiphon for Android directly.

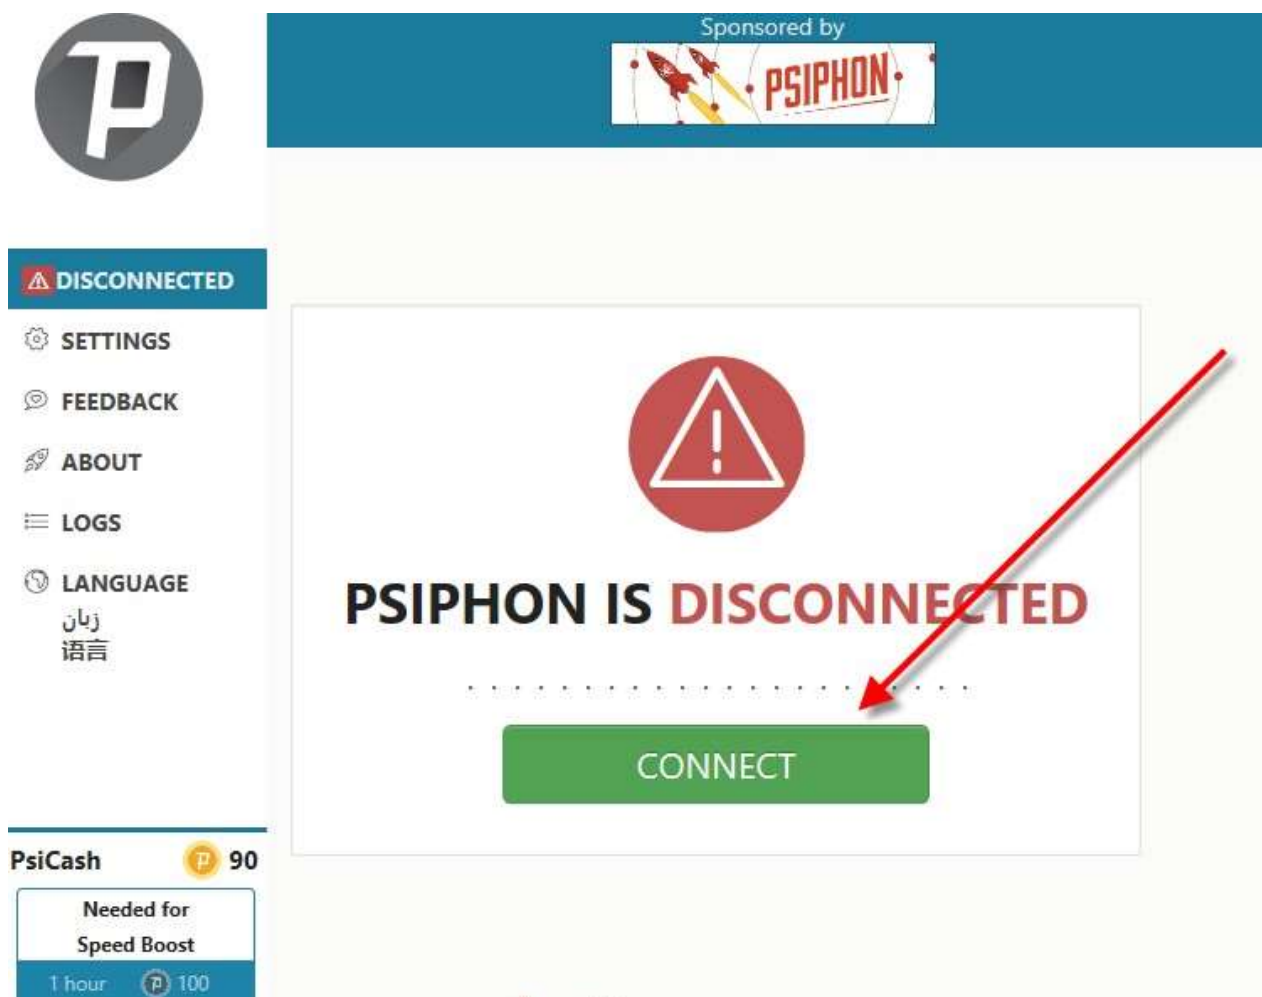

**Psiphon for Windows**  
Works on Windows 7, Windows 8 (desktop), and Windows 10.  
(A legacy build for Windows XP and Vista is available.)

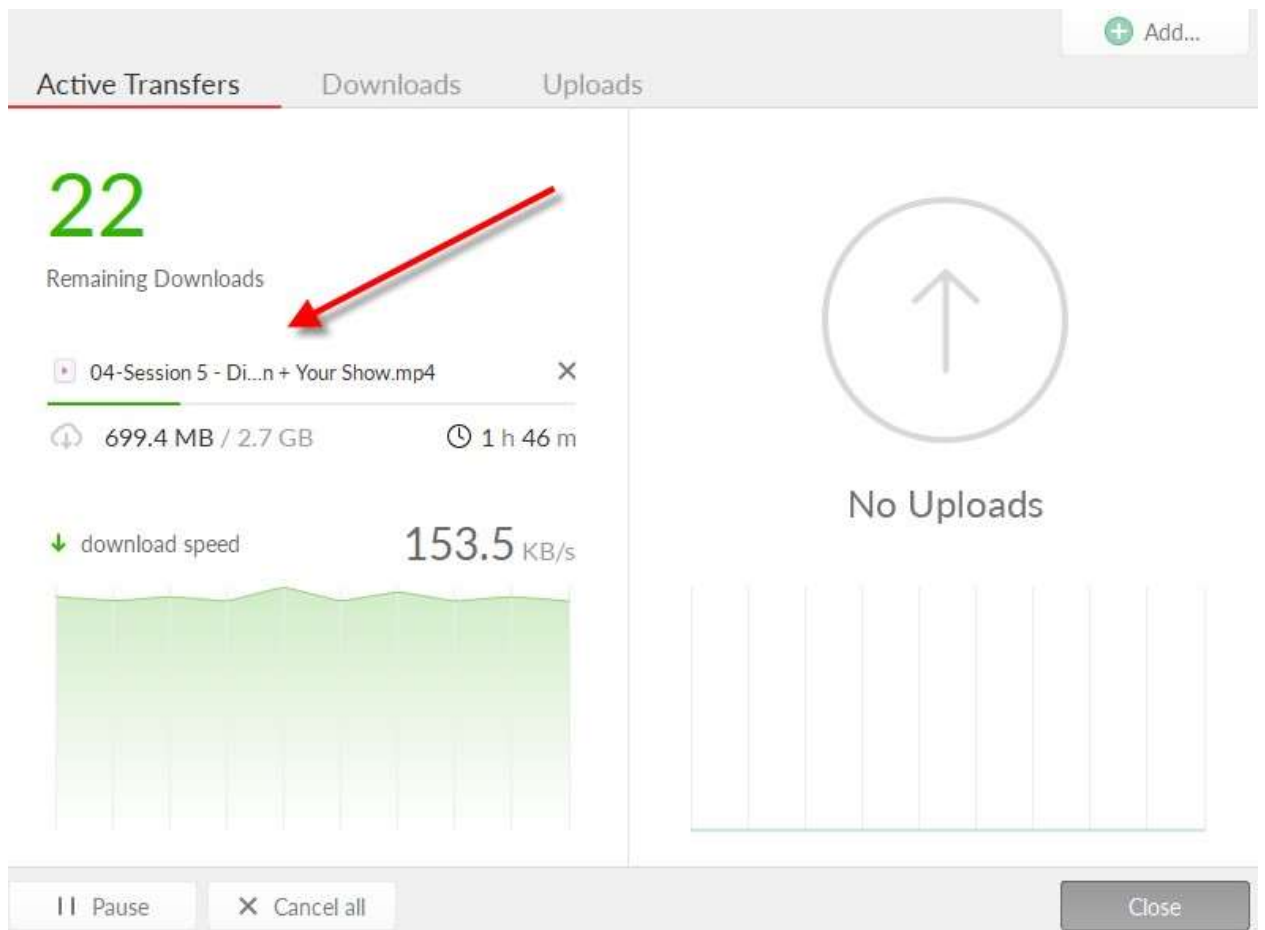

**FREESOFF**  
WORLD NEED OFFERS

join our community [freesoff.com](https://freesoff.com)

**STEP 2:** Now start your download from Mega.nz like you would normally do. Once you see the dreaded screen “Update or Wait” from above, then simply close down Mega.nz & open up your Psiphon app and click connect:

By default it automatically connects to the fastest country. Once connected, simply reopen your Mega.nz downloader and the download will continue

Here's the YouTube video that actually helped me figure this part out:

<https://www.youtube.com/watch?v=ObUZw23LZnl&t=84s>

**THAT'S IT!!!** Now you can create unlimited accounts, bypass the import quota and download as much as you want. Have fun downloading :)
